Experience

Independent Trading Remote
Quant Trader *January 2026 – Present*

- Develop and operate automated strategies for **RFQ-based liquidity provision in crypto combos** and **statistical arbitrage across Kalshi's crypto markets**.
- Executed approximately **30,000 live trades** and **$2M in notional volume**, generating **$20K+ in profit**; peaked at **#75 on Kalshi's all-time crypto profit leaderboard**.
- Develop combo pricing and quoting models, accounting for dependence between contracts, resolution mechanics, adverse selection, and correlated inventory exposure.
- Built a production Python research and execution stack over a **multi-terabyte dataset**, integrating Kalshi order-book updates with multi-venue crypto reference feeds, order management, risk controls, reconciliation, and live monitoring.
- Own strategy research, out-of-sample validation, deployment, and post-trade analysis; evaluate how latency, slippage, fill availability, and capacity affect live performance.

WVU Medicine Morgantown, WV
Machine Learning Intern *June 2026 – August 2026*

- Developed and validated anomaly-detection models over historical data from a pharmacy operation processing approximately **$100M in claims annually**, surfacing abnormal treatment-denial spikes for investigation; delivered the completed modeling core, now being integrated into the pharmacy team's production workflow.
- Built internal integration tools and documentation enabling WVU Medicine's custom Open WebUI deployment to connect with additional internal systems and workflows.

Heron Remote
Co-Founder *June 2026 – Present*

- Built pricing, liability, and hedge-execution models for conditional merchant promotions whose customer payouts are hedged through prediction markets; signed initial bar clients across four U.S. cities.

Darch AI Remote
Co-Founder & Engineering Lead *June 2025 – May 2026*

- Built and operated a Python/FastAPI, Node.js, and FFmpeg content-distribution platform processing **3,000+ monthly video jobs** and supporting content reaching **20M+ monthly impressions** at **85%+ margins**.

National Institute of Standards and Technology (NIST) Gaithersburg, MD
Software Development Intern *June 2025 – August 2025*

- Built an internal RAG help-desk assistant with document-ingestion and retrieval pipelines, and added structured logging to a custom Open WebUI fork for monitoring and failure analysis.

Education

Case Western Reserve University Cleveland, OH
B.S. in Computer Science; Secondary Major in Mathematics *Expected Graduation: May 2028*

- Relevant Coursework: Algorithms, Operating Systems, Linear Algebra, Statistics, Discrete Mathematics, Data Structures

Technical Skills

Languages: Python, Java, JavaScript/TypeScript, C, SQL
Trading & Data: WebSockets, REST APIs, MongoDB, PostgreSQL, PyTorch
Infrastructure: Linux, Docker, FastAPI, Node.js, Git
Spoken Languages: English, Mandarin Chinese
